

# LEVEL 2:

## CURATE YOUR DREAM EXHIBITION

On the reverse of this sheet is a template of our Gallery 2 exhibition space.

We challenge you to cut out the model, construct a maquette of our space and plan your dream exhibition.

Think about how will visitors navigate their way around the artworks. Are they 3D sculptures? Is it an installation? Is the work hung on the wall? Remember not to block the entrances!

Use your imagination. Carefully think about what materials you can use to construct your minitures.

Get up close to your model and imagine being an bite size visitor. Take pictures and make your own installation shots.

If you have a torch how does the lighting affect the space.

Draw rough plan of what you want to put in the space before you start cutting up the sheet.
